HAKKIMIZDA

1986 yılında makine mühendisi Fikri Erdoğan tarafından İzmir Karabağlar'da kurulan şirketimiz, ilk ticaret hayatına tamamen kendi özsermayesinden oluşan bir firma olarak başlamıştır.

Bugün Fersan Filtre A.Ş. olarak İzmir Gaziemir ve Torbalı'da olmak üzere, toplam 21.000 m2 kapalı alanda 200 kişilik çalışan kadrosuyla dünya ile rekabet eden, kaliteden ödün vermeyerek gelişen bir marka olmuştur.

Elektrik süpürgeleri için kağıt toz torbası, sms toz torbası, hepa filtre ürünleri ve dokumasız kumaş(tela) üretim kapasitemizle ve her geçen yıl geliştirdiğimiz teknolojiyle ülkemizin lider kuruluşlarından biri olmayı başardık.

Ürünlerimizin %70'ini Avrupa'nın çeşitli ülkelerine ihraç eden bir Türk firması olmanın haklı gururunu her geçen gün artarak yaşıyoruz.

Kırk yılı aşkın köklü geçmişimizden aldığımız güç, tecrübe, yenilikçi anlayışımızla, ülke istihdamına katkı sağlayarak yerel ekonominin gelişmesi için var gücümüzle çalışıyoruz.

ABOUT US

Founded in 1986 by mechanical engineer Fikri Erdoğan in Izmir Karabağlar, our company started its first business life as a company that was entirely made up of its own equity capital.

Today, Fersan Filter has become a brand that competes with the world with its 200 employees in a total area of 21.000 m2 in Izmir, Gaziemir and Torbalı and is developing by not compromising on its own quality.

With our production capacity of paper dust bags for vacuum cleaners, SMS dust bags, HEPA filter products, non-woven fabric (spunbond raw material) and our technology that we develop every year, we have managed to become one of the leading companies in our country.

We are proud to be a Turkish company that exports 70% of our products to various countries of Europe.

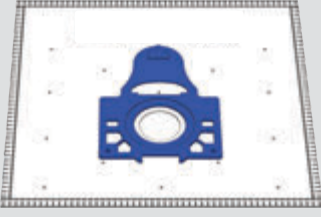

With the strength, experience and innovative understanding we have gained from our over forty years of deep-rooted history, we are working with all our strength for the development of the local economy by contributing to the country's employment.
